EDUCATION

University of Pennsylvania | B.A. Economics; Minors in Statistics & Data Science | Philadelphia, PA

May 2027

GPA: 3.84 | Machine Learning in Business, Advanced Probability, Economic Statistics, Accounting

EXPERIENCE

PwC Strategy& | Deal Technology Strategy Intern | New York, NY

Jun-Aug 2026

- Supported AI strategy across private-equity diligence and value-creation workstreams, assessing model, data, and infrastructure maturity; translating technical risk into investment implications; and sequencing execution roadmaps.
- Built reusable agent frameworks for consulting research and analysis, standardizing workspace instructions, source-of-truth hierarchies, specialist delegation, review gates, and human approval boundaries so outputs remained traceable and reproducible.
- Presented a practical agents playbook to 100+ Strategy& professionals, teaching teams how to structure workspaces, coordinate specialist agents, and keep people on client-facing and irreversible decisions.

Radar Autonomy | Founder & Lead Builder | New York, NY

2026-Present

- Designed and built an end-to-end decision system for autonomous-fleet depot sourcing, diligence, underwriting, and dossier generation: 33 page routes, 34 API handlers, and a gated geospatial workbench.
- Built the evidence and agent infrastructure across 230,553 GeoJSON features and 28 datasets, with 44 automated integrity checks and four autonomous refresh pipelines; every claim carries source, as-of date, confidence, and next diligence step.
- Architected the agent operating system beneath the product: deterministic routing, signed context packets, 78 pinned routing cases, 23 adversarial safety evaluations, and human approvals for send, spend, sign, and release.

Fingerpaint Group | AI Operations Intern | Philadelphia, PA

Sep 2025-Present

- Built and deployed agents for paid-search optimization and media-brief generation; mapped end-to-end workflows and defined time-to-brief, campaign-performance, and error-rate KPIs to guide iteration.

GradeWiz (YC-backed) | Student Success Engineer | New York, NY

Jun-Aug 2025

- Led pilots across five NYC private schools and signed two clients; embedded the grading agent in teacher workflows and shipped OCR/rubric, batching/caching, and evaluation improvements with the research team.

LEADERSHIP

Education Consulting at Penn | Co-Founder & President | Philadelphia, PA

Sep 2024-Present

- Founded and scaled a 40+ member consultancy; led a nonprofit turnaround that increased membership 75% and organized events with SpaceX's Ad Astra program for 60+ participants.

SKILLS

AI & Engineering: Agent orchestration, agent evals, Claude Code & Agent SDK, MCP, Python, TypeScript/JavaScript, SQL, R, LangChain, n8n, Next.js/React, Postgres, MapLibre GL, geospatial ETL
